

Kid tested. FDA authorized?

Juul and other e-cigarette companies hooked millions of kids with fun flavors and massive doses of nicotine. Now Big Tobacco and other e-cigarette companies are asking FDA for authorization to keep selling the flavored, nicotine-loaded products that addict our kids. The FDA has the power to stop them - by upholding its mission to "protect the public health" and rejecting Juul and other e-cigarettes that endanger our kids.

FDA: OUR KIDS ARE COUNTING ON YOU.
